Abstract (en)

[origin: WO2013072836A1] The invention relates to an isolated sequence of amino acids, consisting of SEQ ID NO:1, a homologue presenting a homology of at least 80% with said sequence and a similar biological activity, or an active fragment consisting of 280 to 675 contiguous amino acids of said sequence or of said homologue, for use as an antiproliferative agent against cancer cells for preventing and/or reducing and/or treating a cancer.
