Abstract (en)
[origin: WO2013072000A2] The invention proposes an operator control element (1) for a vehicle, wherein the operator control element (1) has a plurality of operator control areas (12.1, 12.2, 12.3, 12.4, 12.5, 12.6) and comprises a region (2) which faces an operator and a region (3) which is located in a vehicle trim panel (6). The operator control element (1) is distinguished in that it is mounted such that it can pivot about a rotation axis (4).
