Abstract (en)

[origin: WO2013072090A1] The invention relates to an attachment element (7) for mounting a vehicle seat (1) on a vehicle structure (2). According to the invention, the attachment element (7) comprises a sleeve (9), at one end of which a lever element (10) is arranged, and an element (13) which is embodied essentially in the manner of a hollow cylinder and which comprises at least two wing-like extensions (14) lying opposite one another, and which at least partially surrounds the sleeve (9). Furthermore, the invention relates to a method for mounting a vehicle seat (1) on a vehicle structure (2) by means of at least one fastening element (7).
