Abstract (en)

[origin: WO2013072009A1] The invention is based on a seat control device, in particular for an air passenger seat, with a seat control unit (10) which is provided for activating at least one comfort unit (12). It is proposed that the seat control device has a communication unit (14) with a data interface (16) for exchanging data between the seat control unit (10) and an individual user unit (18).
