Abstract (en)

[origin: WO2013053061A1] A traffic management device comprises at least opening in the surface of its body to facilitate hand grasping of a single or stacked plurality cones. The traffic management devices may be in the shape of a cone. The device further comprises a registration structure so that a worker can align the devices in a stacked configuration so that the cut outs of each opening are aligned to create a handhold for the stacked cones.
