Abstract (en)

[origin: WO2013072631A2] The invention relates to an electric starter for internal combustion engine comprising: an electric motor (M) combined with means (R, L) for driving the internal combustion engine and an electronic filter (10) that is arranged on a power circuit (3) of the electric motor (M) that is suitable for at least reducing the electromagnetic disturbance caused by the operation of the electric motor (M). According to the invention, the electronic filter (10) is placed inside a cover (11, 30) of the starter.
