Abstract (en)

[origin: WO2013072112A1] A system for limiting damage in a dangerous situation for a motor vehicle comprises a first detection device for detecting the dangerous situation, a second detection device for detecting a status of the motor vehicle, a processing device for determining an action instruction on the basis of the dangerous situation and the status of the motor vehicle, and a communication device for communicating the action instruction to a person in the area of the motor vehicle. A method for limiting damage in a dangerous situation for a motor vehicle comprises steps for detecting the dangerous situation, detecting a status of the vehicle, determining an action instruction on the basis of the dangerous situation and the status of the vehicle, and communicating the action instruction to a person in the area of the vehicle.
