Abstract (en)

[origin: EP2781469A1] A device for breaking up lumps for the free-flowing unloading of granulates into container receptacles, for granulates contained in liner-type bags (2) in shipping containers (3), comprising a grinding unit (4) formed by a rotating shaft (5) operated by an electric motor (6), and to the lower end of which there are coupled one or more blades (7), and a securing frame (8) provided with means for fixing and clamping to the frame (31) of the container, said unit and said securing frame being linked to one another in an articulated manner enabling a rest position aligned with the securing frame (8) for storing, moving and introducing it in the container, and a use position perpendicular to the securing frame (8) and with the blades (7) inside the bag (2) immersed in the granulated product.
