Abstract (en)  
The invention relates to a paver block (1) having a tread surface (2), a base surface (3) extending parallelly thereto and four side surfaces (4,5,6,7), and spacers (8,9) arranged on at least two of its side surfaces (4,5,6,7), and a first spacer member (8) is arranged on one of two adjacent side surfaces (5,6,7) and a second spacer member (9) is arranged on the other side surface (5,6,7) of said two adjacent side surfaces (5,6,7), and the first spacer member (8) is a rib extending parallelly to the tread surface (2), and the second spacer member (9) is a pair of ribs extending along a line perpendicular to the tread surface (2), and a distance (L) between the members of said pair of ribs is at least equal to the width (S) of the first spacer member (8), and the first spacer member (8) is arranged on the side surface (4,5,6,7) directly along a plane (s) being parallel to the tread surface (2) and intersecting the distance (L) between the members of said pair of ribs of the second spacer member (9) at half of said distance (L).
