Abstract (en)

[origin: EP2781655A2] The element (1) has a sliding system (3) comprising an aperture (52). A base element (4) is arranged at a carrier (10) that is arranged in the aperture of a sliding element (5). A sliding face (2) is arranged in the aperture and formed on an opposed side of the sliding element. A cutting part (53) is located in the aperture of the sliding element. The sliding element is spaced apart from the carrier by another spacer element. The base element comprises a fixing element (43) that is extended away from a base. The fixing element of the base element is provided with a coating part. The base element is made of polymeric material. The sliding element is made of ceramic, silicate material and porcelain.
