Abstract (en)

A panel (1) is disclosed for forming skylights in roofing structures, comprising at least one first layer (2) of transparent material and at least one reinforcing layer (3) comprising at least one net, preferably a metal net, constrained to the surface (2a) of the layer of transparent material. The panel further comprises constraining means (15) for the constraint to the roofing structure. The reinforcing layer (3) is constrained in contact with the surface (2a) of the at least one first layer (2) of transparent material, preferably by means of an adhesive. It is also described a method for the production of the panel (1), comprising the step of constraining at least one reinforcing layer (3) to the surface of at least one first layer (2) of transparent material.
