Abstract (en)  
[origin: EP2781672A1] The cover has a set of roof modules that is arranged in a movable or non-movable manner. The set of roof modules is formed of a supporting frame formed from a set of panels (400). Two beams are braced by a set of cross-pieces. A pair of frame sections (310) is arranged to receive an edge of the cover, and is preformed with a profile retainer so as to allow sliding of a pair of profiles. The frame sections are placed between the beams to accommodate the panels.
