Abstract (en)
[origin: WO2013078454A1] The invention consists of the addition of a post (30, 130, 230, 820, 920, 1710, 1810, 1910, 2010, 2220, 2320) to eating utensils where the post raises the working end (10, 110, 210, 810, 910) of the utensil above the surface (60, 160, 260) on which the utensil is placed. This raising helps prevent the working end of the utensil from being contaminated by substances on a table or other planar surface.
