Abstract (en)
[origin: WO2013077862A1] An accessory tool (24) is configured to be coupled to a power tool (20) having a tool drive structure (16). The accessory tool (24) includes a spring component (44) and has a first arm (38) and a second arm (40) attached to the spring component (44). The first arm (38) includes (i) a first proximal end portion (48) defining a first accessory drive structure that is configured to mate with a first portion of the tool drive structure (16), and (ii) a first distal end portion (52) having a first holding structure (56). The second arm (40) is spaced apart from the first arm (38) and includes (i) a second proximal end portion (50) defining a second accessory drive structure that is configured to mate with a second portion of the tool drive structure (16), and (ii) a second distal (54) end portion having a second holding structure (58).
