Abstract (en)

[origin: WO2013041767A1] The invention relates to a sliding element for the summer use of slopes, for example, ski-jumping slopes, which sliding element (10) includes a sliding surface (12) formed of one or several yarn layers (14) attached together, in which sliding element (10) each yarn layer (14) is formed of individual fibres (32). The sliding surface (12) is formed of at least two different material layers.
