Abstract (en)

[origin: CA2854203A1] The invention relates to a light (1) comprising a housing (2) with at least one illuminant (8) and an illuminant holder (9). In order to enable a targeted light emission and hence illumination of a particular region, the housing (2) has a translucent housing element (3), which can be covered at least partially by at least one moveable screen (4, 5) and thus limits the emission angle.
