Abstract (en)

[origin: WO2013076003A2] The invention relates to a heat insulation housing for a refrigerating device, in particular a household refrigerating device, comprising an interior wall (3) defining a cooling chamber, an exterior wall (5), a wall intermediate chamber (9) which is filled with a heat insulating material (11) and in which a vacuum insulation panel (13) is arranged. Said exterior wall (5) forming angled edge strips (33) on opposite housing edges (35), said edge strips being joined to the inner wall (3) and/or to other defining wall parts (6, 7), for example, the base, the top or rear wall. According to the invention, the vacuum insulation panel (13) is mounted on the edge strips (33) of the outer wall (5).
