Abstract (en)

[origin: WO2013076420A1] The invention relates in particular to methods for managing: user communication terminals, the anonymisation of private user communication identifiers, and the use of private user communication identifiers. Upon designation of a social identifier of a first user, the aforementioned methods can be used to transmit one of the private communication identifiers associated with said first user to a communication establishment device for the purpose of anonymously connecting the first user with a second user having designated the social identifier.
