Abstract (en)

[origin: EP2783799A2] A robot system 100 includes a first robot arm 14 and a robot controller 6. The first robot arm 14 extends in a first direction and includes a holder 12 to hold a workpiece placed on a workpiece placement stand 201. The holder 12 includes a distal end portion and a base portion. The base portion is coupled to the first robot arm 14 such that a turning axis of a portion of the first robot arm 14 to which the base portion of the holder 12 is coupled is apart from a geometrical center of the holder 12. The robot controller 6 controls the holder 12 to hold the workpiece while controlling the first robot arm 14 to turn the holder 12 with the distal end portion of the holder 12 oriented in a direction crossing the first direction.
