Abstract (en)
A liquid discharging apparatus includes a transportation belt that has a medium supporting surface and is capable of transporting a medium while supporting the medium on the medium supporting surface, a discharging head that discharges liquid onto the medium supported by the transportation belt, a cleaning mechanism that has a cleaning member making contact with the transportation belt so as to clean the medium supporting surface with a cleaning solution, a heater that supplies heat to a cleaning portion of the medium supporting surface by the cleaning member, and a controller that controls a cleaning temperature on the cleaning portion by driving the heater.
