Abstract (en)  
The skirting board has in the front surface ( 1 ), above half of the height of the beam a curved convex surface( 1a ) changing over to a plane ( 1b ), wherein at the point of transition of the curved convex surface ( 1a ) to a plane ( 1b ) an offset ( 1c ) is located with a depth ( h ) an offset is cut with a depth not less than the total thickness of the decorative material (3) and the thickness of the front wall of the cap ( 2 ). In the portion of the offset ( 1c ) there is a mounting chamber ( 1m ), in the short sides of which, located between the bottom ( d ) of the mounting chamber ( 1m ) and the plane ( 1b ), there are slots ( r ), wherein the dimensions of the mounting chamber ( 1m ) as well as the shapes and dimensions of the slots ( r ) correspond to the shapes and dimensions of the mounting elements ( 2a ) of the cap ( 2 ) with a sealing lip ( 2b ), extending along its edge. The cap ( 2 ) is mounted in slots ( r ) of the mounting chamber ( 1m ), so that at least a portion of the sealing lip ( 2b of the cap ( 2 ) extends beyond the lower edge of the plane ( 1b ). The decorative material ( 3 ) covers the edge of the surface of the sealing lip ( 2b ), the entire height of cap (2) and the front surface ( 1 ) and a fragment of the back surface ( 4 ). Along the line of transition from the edge of the cap ( 2 ) to the edge of the offset ( 1c ), there is an incision ( N ) made in the decorative material ( 3 ).
