Abstract (en)
[origin: EP2784248A1] The gear assembly has a transmission housing (2) having a gear wheel (3) and a coupling portion (13). The coupling portion has a drive rod (14) coupled with an actuator of gear wheel in movement direction of gear wheel. The coupling portion has a blocking contour which cooperates with a locking contour of the transmission housing. Upon actuation of the gear wheel, unlocking or locking of the drive rod fitting is carried out such that transverse movement of drive rod in movement direction is carried out.
