Abstract (en)

[origin: EP2784259A1] The strip (10) has a base area (12) formed at a guide foot (50) for application of the strip on a building element. A profile body (20) is connected with the foot over a sliding link (30) and displaced relative to the foot in a transverse direction. The link is formed with gutter-shaped side wall strips (35). A set of hook elements (40) is arranged at the wall strips, and retaining strips (38) are arranged at the foot parallel to the wall strips and correspond to another set of hook elements (44) to form a detent connection. The link is fixed against the foot in a detent direction.
