Abstract (en)

[origin: EP2784672A1] The present invention discloses a method for processing information, a storage medium and a browser. The method includes: a browser receiving non-processed information, and calling a corresponding browser plugin according to a type of the non-processed information; and the browser calling a corresponding third-party software through the browser plug-in, and processing the non-processed information using the third-party software. The browser of the present invention calls a third-party software via the browser plugin, and submits complex non-webpage information cannot be processed by the browser to the third-party software for processing, and this method expands the scope of the information can be processed by the browser, and improves the information processing capability of the browser. Furthermore, the third-party software and the browser are independent from each other, a size of an installation package of the browser can be reduced, and the health degree of the third-party software can also be improved. Additionally, the interaction of the browser plugin and the third-party software improves the mutual viscous of the third-party software and the browser, as a result, the third-party software get more exposure under the support of the browser.
