Abstract (en)  
The invention relates to a workpiece carrier device for the production of connectors and/or cables having connectors. The object of the present invention is to make the production of connectors and/or cables having connectors less time and cost intensive and to reduce the percentage of deficient products. The object is solved by providing a workpiece carrier device (1) comprising: a machine adapter part (2) having a housing (3) adapted to mate with workpiece holders of at least two production modules; and a connector adapter part (5) located at a forward end (6) of the housing adapted to hold and position a connector workpiece (4) from which the connectors are produced.
