Abstract (en)

[origin: WO2013079813A1] The adapter is designed to be arranged in the device (13) for introduction into the machine (1) and to make it possible to load the capsule (3) in an intermediate position located in the vertical direction at a second height between the first height minus 2 mm on the one hand and the first height plus 2 mm on the other hand and/or in which the central axis (X) of the capsule forms an angle of less than 15° with respect to the predetermined orientation.
