Abstract (en)

[origin: WO2013110397A1] The invention relates to a rail vehicle with a partition wall (1) running in the transverse direction of the rail vehicle, said partition wall being connected to at least one side wall (2) of the rail vehicle, wherein the connection of the partition wall (1) to the side wall (2) is provided via an elastic element (7) designed to accommodate forces attributable to torsions or changes in length of the rail vehicle.
