Abstract (en)
[origin: WO2013156710A1] The invention relates to a container (1) made from a plastic material and comprising a body (2) that extends along a main axis (X) and a base (4) that extends down from the body (2). The base (4) comprises: an annular support (5) defining a bearing plane (6); and a conical arch (10) that extends into the container (1) from close to the support (5) to a central apex (12), the cross-section of said arch (10) having a star-shaped profile inscribed between two circles (13, 14) of which the ratio of diameters (D1, D2) is greater than or equal to 0.7.
