Abstract (en)
[origin: WO2013079717A2] The invention relates to an apparatus (10, 100) for feeding notes of value (24) to a thin-walled transport container (12), which comprises a stacking unit (20) by means of which the notes of value (24) which are to be fed are stacked into a note-of-value stack in a stacking region (26). The apparatus (10, 100) also has a closure unit (40), which, in a closed position, is arranged such that it closes the opening of the thin-walled transport container (12) and, in an open position, is arranged such that notes of value (24) can be fed to the thin-walled transport container (12). The invention further relates to a method for feeding notes of value (24) to a thin-walled transport container (12).
