Abstract (en)

[origin: WO2014023181A1] Methods and devices for processing a tabbed-page are disclosed. In an exemplary method, when a pinning operation command with respect to a tabbed-page in a browser is received from a user, a first display area can be obtained from a screen of a tabbed-page processing device. A corresponding first Ulwebview based on the obtained first display area can be created by the tabbed-page processing device. Content of the tabbed-page can be loaded via the first Ulwebview to pin the tabbed-page. Accordingly, an exemplary device for processing a tabbed-page can at least include an area obtaining module and a pinning module.
