Abstract (en)
[origin: WO2013079793A1] The invention relates to a system for money transfer, the system (10) comprising - a mobile terminal (112) of a user (112'), connected to a mobile communications network (130) for transmitting a payment request, - a network terminal (132) of the user (112'), for registration of the user (112'), and - a server (114) comprising a memory unit and an Internet server (126) with a web application (116), and in which system (10) the money transfer is configured to be performed in three steps, the first being the registration of the user (112'), the second being a request for mobile payment, and the third being the bank transfer. In the system, the server (114) comprises software tools configured - to manage a number of the system's own bank accounts, - to select at least one source bank account from the system's own bank accounts for the payment, by using an automatic algorithm, on the basis of the bank account data of the recipient (128) of the money, - to transmit a payment request for transferring the money.
