Abstract (en)

[origin: EP2600611A1] A portion (5,6) of monitoring area (2) within which objects (9.1,9.2) is monitored by each image sensor (3,4) and the detected data is output. The image sensors are oriented to monitor portion of monitoring area and each of the objects which are located in the monitoring area always. The rating of correspondence of the object is assigned to determine the totality of the objects based on the detected data. An independent claim is included for device for monitoring of objects in monitoring area.
