Abstract (en)

[origin: EP2786676A1] The present invention refers to a fastening device (1) for furniture shelves or wall shelves comprising: an L-shaped body member (2) for supporting a shelf (R), said body member (2) being connectable to an inner surface of a piece of furniture (F) or to a wall, and a fixing element (4) associable with said body member (2), said fixing element (4) being movable between a raised position and a lowered position. In particular, said fixing element (4) is rotatably associated with said body member (2) to move between said raised position and said lowered position, a locking element (5) comprising locking means (50) being slidably associated with said fixing element (4) and movable between an unlocking position and a locking position, wherein said fixing element (4) is in the lowered position.
