Abstract (en)
[origin: WO2013070603A1] The invention provides compositions comprising immunogenic fragments of ApoB-100 for eliciting an immune response in a subject or vaccinating a subject, so as to treat, prevent, inhibit and/or reduce symptoms of kidney diseases in the subject. The compositions include immunogenic fragments of ApoB-100, CD8+ T cells activated with immunogenic fragments of ApoB-100 or a combination thereof.
