Abstract (en)
[origin: WO2013083142A1] The invention relates to a method for operating a production plant (10) having a plurality of working areas (12), in which respective work stations (14) for carrying out at least one respective working step are arranged, and having at least one transport system (22), by which goods to be processed are transported on at least one predetermined path between the work stations (14). The arrangement of the work stations (14), the working step that has to be executed by the respective work station (14) and the at least one predetermined path are selected according to at least a predetermined criterion that relates to a product requirement and are adapted when the at least one criterion is modified.
