Abstract (en)

[origin: WO2013083722A2] The invention relates to a sensing device (10) for markers on a roll, in particular a format roll (110), in the printing region (100) of a printing press (200), having a pivotable sensing arm (20) with a sensing head (22) for sensing the markers and a drive (30) for pivoting the sensing arm (20) between a sensing position (A) and a parked position (P). It is provided according to the invention that the sensing head (22) can be shielded in the parked position (P) by at least one shielding element (40) with respect to the printing region (100) of the printing press (200).
