Abstract (en)

[origin: WO2013083516A1] The invention relates to a method for controlling an occupant protection means (108) which has at least two levels of protection for an occupant (106) of a vehicle (100). The method has a step of selecting one of the at least two levels of protection of the occupant protection means (108) as the level of protection to be used in the event of an impact of the vehicle (100) using a yaw direction of the vehicle (100).
