Abstract (en)

[origin: WO2013083671A1] The invention relates to a method for coating a substrate, in which a starting material (P) in the form of a process beam (2) is sprayed on a surface of the substrate (10) by means of thermal spraying, wherein initially the surface of the substrate (10) is pretreated without application of material by a plasma flame (2') of a plasma spray device (3,3') and then the surface is subjected to the process beam (2) that comprises the starting material (P).
