Abstract (en)  
[origin: WO2013083299A1] The present invention relates to an illumination angle adjusting device (10), for an illuminating device (100) comprising a light source (4), characterized in that the illumination angle adjusting device (10) comprises a base accommodating the light source (4) and a rotatable optical device (2) mounted on the base and rotated with respect to the light source (4). The illumination angle adjusting device (10) of the present invention can adjust an illumination area merely by rotating a lens (12) and has the prominent advantage of convenient adjustment.
