Abstract (en)

The present invention relates to bottle separator comprising at least first sheet (1) and at least a second sheet (2) which are provided with complementary grooves (3) engageable to each other defining a plurality of housings for the bottles, said first sheet (1) and second sheet (2) defining, according to their use position inside the carrier, an upper edge (4), a lower edge (5) and sides (6), and is characterized in that each side (6) of the first sheet (1) and second sheet (2) comprises a side projection (7) perpendicular to said upper edge (4). The invention also relates to a method and a machine for placing said separator in a bottle carrier. The invention can be used to place separators more easily inside bottle carriers.
