Abstract (en)

[origin: WO2014167101A1] The invention relates to an offshore installation (1) having a two-stage offshore retention system on the seabed (31), which offshore retention system has a gravity-based grounding device (44) which secures the grounded offshore installation (1) so as to prevent the latter from slipping on a seabed (31) when operating loads up to a threshold state of the operating loads act on the offshore installation (1), and which offshore retention system has an anchor system (30) which secures the offshore installation (1) so as to prevent the latter from slipping on the seabed (31) when extreme loads beyond the threshold state of the operating loads act on the offshore installation (1).
