Abstract (en)

[origin: EP2789721A1] A combination type auto dye-preparation/metering dyeing system includes a liquid dispensing module ( 3 ) for metering a dye solution to be dispensed, a receptacle input module ( 5 ) for carrying receptacles ( 81 ), a rotary table module ( 2 ) for transferring each receptacle ( 81 ) to a weighing scale ( 80 ) to receive a predetermined amount of the dye solution dispensed by the liquid dispensing module ( 3 ), a standard concentration liquid preparation module ( 4 ) for preparing the desired dye solution for the liquid dispensing module ( 3 ), a receptacle output module ( 6 ) for receiving the receptacles ( 81 ) with the dispensed dye solution from the rotary table module ( 2 ), a dyeing module ( 7 ) for transferring the dye solution from the receptacles ( 81 ) to respective dyeing container ( 51 ), and a control unit ( 1 ) for controlling the operation of each part of the combination type auto dye-preparation/metering dyeing system. The combination of the system can be selectively set to fit the requirements of different clients.
