Abstract (en)
[origin: RU2647267C2] FIELD: agriculture; machine building.SUBSTANCE: invention can be used in agricultural working machines. Agricultural working machine (1) contains drive motor (5) and cooling radiator (9). Cooling radiator (9) comprises fan (10) with variable number (n) of revolutions. Working machine has transmission (11) for fan (10), comprising input shaft (12), output shaft (14) and variator (15). Output shaft (14) drives fan (10). Input shaft (12) is located transversely to output shaft (14) and is connected to drive motor (5). Variator (15) is located between input shaft (12) and output shaft (14).EFFECT: technical result consists in increasing convenience of mounting the drive for a fan suitable for a transversely disposed drive motor.15 cl, 3 dwg
