Abstract (en)
[origin: EP2789946A1] A refrigerator includes an insulated cabinet, a pair of reinforcing member mounting portions and a bridge-shaped reinforcing member. The insulated cabinet is constructed into a box shape and has an insulating material between outer plates constituting an outer surface and inner plates constituting an inner surface. The paired reinforcing member mounting portions are located on a pair of the inner plates opposed to each other in an interior. The bridge-shaped reinforcing member has one of two ends connected to one of the paired reinforcing member mounting portions and the other end connected to the other paired reinforcing member mounting portion.
