Abstract (en)
[origin: EP2789952A1] A refrigerator according to an embodiment of the present invention is equipped with an insulated housing, and a covering member. The insulated housing is provided as a refrigerator main body, and is coupled to a plurality of insulated wall members provided to an insulated panel between an outer shell and an inner shell. The covering member is provided to a required coupling section among coupling sections of the plurality of insulated wall members, and seals said coupling section.
