Abstract (en)

[origin: WO2013087996A1] The invention relates to a machine for preparing a beverage by extraction from a capsule, including: a recess (3) for receiving the capsule; and a device (4) for supplying the recess (3) with at least one pressurized fluid. The supply device (4) includes at least one device (59) for heating a fluid to be supplied to the recess (3), and at least one device (41) for cooling a fluid to be supplied to the recess (3).
