Abstract (en)

[origin: WO2013087189A2] To solve the problem of providing a holding device which allows an arrangement therein of a container not specifically designed for a dispensing device, such a holding device is proposed for a container for in particular liquid products, in particular soaps, which can be inserted in a dispensing device, comprising a holding part for releasable arrangement in the dispensing device, a receiving part for releasably receiving a connecting element for the container, and a supporting part which provides a support for the container.
