Abstract (en)

[origin: WO2013095118A2] The present invention relates to a device for playing pole soccer, comprising a skittle, a support for supporting the skittle on a ground surface, a connection between the skittle and the support, wherein the connection between the skittle and the support provides at least one stable position in which the skittle extends substantially perpendicularly of the support, and wherein the connection is adjustable for the purpose of determining, subject to the setting, a moment, force or torque with which the skittle can be forced out of the at least one stable position.
