Abstract (en)

[origin: WO2013088089A1] Clutch with compensation for wear, notably for a motor vehicle. The invention relates to a clutch with compensation for wear, notably for a motor vehicle, and comprising wear-compensation means (33) comprising a ratchet (60) that operates a ratchet wheel (56), the ratchet comprising control stops (66) intended to rest against a cover (8), the ratchet being designed in such a way that the control stops (66) are made to rest against the cover (8) by a diaphragm when the latter is moved outside of a normal operating zone defined between clutched and declutched positions.
