Abstract (en)

[origin: WO2013088090A1] The invention relates to a charge for a munition (10), comprising an explosive charge (40), an inert charge (50) and at least one pyrotechnique transmission unit (60) designed to transmit a remote-initiated detonation to said explosive charge (40). The invention also relates to a munition incorporating such a charge, said munition (10) comprising an elongate hollow body (12) able to house the explosive charge (40) and the inert charge (50), and a firing device (20), at least part of the inert charge (50) being interposed between the firing device (20) and said explosive charge (40), and the pyrotechnic transmission unit (60) being provided with a pyrotechnic extension (64) and coupling the firing device (20) to the explosive charge (40) in such a way as to allow the explosive charge to be primed to detonate under the action of the firing device (20).
